## **Organizational Announcement - Spec e30 Series Director**

*December, 7th 2011*

**Gurnee, IL** - NASA Midwest is pleased to announce that Kyle Burkhardt will be our Spec E30 Series Director for the NASA Midwest Region. Kyle has been a BMW enthusiast since purchasing his first BMW in 2002. Kyle was previously the Vice President and then President of the Windy City BMW Club. He and his E36 M3 developed in the NASA system from HPDE to Time Trials and finally into wheel-to-wheel racing in the German Touring Series. After a brief stop in Spec Miata, Kyle has returned to his roots in a 1987 Spec E30.

Kyle Burkhardt said, "I am thrilled to be involved in a true enthusiast race series that honors a great marque in touring car racing. The E30 is a popular and very capable chassis for racers on a budget. More importantly, it's a car that people are passionate about. It's a perfect formula for close competition and even closer friendships with your competitors. I'd like to thank Dave and the NASA Midwest staff for giving me this opportunity."

"Kyle will be a great addition to the growing NASA Midwest Team. His enthusiasm for motorsports and knowledge of the BMW platform make him a perfect fit for the Spec E-30 Series Director role. Having worked through the HPDE program, he knows the NASA system and will help all drivers reach their personal goals. I very happy to have Kyle on our team", said Dave Royce, Regional Director for NASA Midwest Region.

### **About NASA**

The National Auto Sport Association (NASA) was formed in 1991 to deliver high quality motorsports events to enthusiasts at major racing venues throughout the nation. NASA has created programs that allow owners of both racecars and high-performance street-driven vehicles to enjoy the full performance capabilities of their cars in a safe and controlled environment. NASA offers many different programs that will allow you to enjoy motorsports on a number of different levels, including our Car Control Clinic, High Performance Driving Events (HPDE), Rally Sport, Time Trial, NASA-X and Competition Racing programs.
